Appl. No.: Unknown Atty Docket: TOYA117.007APC

Figure 1 is a scatter plot showing the percentage of correct responses for three groups: HV (Healthy Volunteers), CP (Control Patients), and PC (Parkinson's Disease Patients). The y-axis represents the percentage of correct responses, ranging from 0 to 100. A dashed horizontal line at 12% indicates the chance level. The HV group shows a mean of approximately 10% with a small error bar. The CP group shows a mean of approximately 15% with a larger error bar. The PC group shows a mean of approximately 30% with a large error bar. Significance markers \*\* and \* indicate statistical differences between groups.
